Text Summary -
Overall, The majority of comments are very positive(14 vs 6), both about CU Boulder, as well as induvidual programs. Many students liked their programs and felt like they mattered at CU. One person even said “I have a professor who hands out his cell phone number and encourages students to call.” to show how much they felt they mattered at CU. 10 people were overwhelmingly positive about their professors/programs while 8 were overwhelmingly positive about CU Boulder as a whole. Of the non-positive comments, 4 were conflicted reviews, focusing heavily on both positive and negative aspects, while 2 were clearly negative.

This leads us to believe that the view of CU is mostly positive, but with a few valid criticisms as well.
